***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garcia, US Patent # 6272474.

The reference teaches of identify one or more instruments, each of the one or more instruments comprising at least a financial asset or at least a tradeable security by determine technical strength of each of the one or more instruments based on market characteristics associated with that instrument. (col. 1, lines 53-62).

The reference fails to teach the market characteristics comprising one or more trade volumes, one or more trade prices and one or more directions of movements of trade prices and to rank the one or more instruments based upon their technical and fundamental strengths.

Art Unit: 3693

It would have been obvious for one skilled in the art at the time to have selected each of these characteristics as these are routine well known exogenous variables in the art of technical analysis. Moreover, it would have been obvious for one skilled in the art to have ranked the instruments and to generate buy and sell signals based on the data as motivated by the need to profit from the analysis.
